LABELS
& THERMAL TRANSFER RIBBONS

High quality self-adhesive labels, tags and thermal transfer ribbons to suit all label printers and thermal transfer coders

LABELS & TAGS

Plain labels – on-site production ensures fast delivery of paper and synthetic labels to suit all label printers and automatic labelling systems

Coloured labels – standard coloured and custom coloured labels are produced on site in a wide range of materials. Our colour-matching service ensures accurate colour reproduction

Tags – Plain and printed card and synthetic tags are produced for a wide variety of application including swing tickets, tote tags and plant tags

Printed labels – single or multi-colour pre-printed labels are available on a wide range of paper and synthetic materials

Stock labels – common sizes of labels are held in stock for immediate delivery in roll formats to suit most label printers – see overleaf for examples

Bureau label service – for small volumes of printed labels or where variable information is required on each label, for example serial numbers or sequential bar codes

Materials – a vast selection of label and tag materials is available including thermal and thermal transfer paper and card, PE, PP, vinyl, polyester. Adhesives include permanent, high-grip, removable, deep freeze, wash-off and many more

THERMAL TRANSFER RIBBONS

Quality – Martek supplies high quality wax, wax-resin and resin thermal transfer ribbons to ensure clear, sharp printing on all types of label and tag material

Variety – Black and a wide range of coloured ribbons are available to suit all makes and models of label printer

Value – All ribbons are offered at highly competitive prices without compromising quality

Flexibility – Many sizes and configurations to suit most common label printers are held in stock for immediate delivery

LABEL PRINTERS AND LABELLING SYSTEMS

Label Printers – The Valentin and SATO label printer ranges include thermal transfer and direct thermal label printers for all applications and budgets.

Printers range from low-cost models for printing small quantities of labels in office or light-industrial environments to heavy-duty industrial printers capable of printing thousands of labels an hour around the clock.

NiceLabel software allows all brands of label printer and office printer to be controlled from the same software package

Automatic Labelling Systems – Martek's automatic labelling systems include print-and-apply systems, wrap-around bottle labellers, pallet labellers, top-and-bottom labellers and many other online systems.

Valentin Thermal Transfer coders – Continuous and intermittent coders for direct printing on most types of packaging machine
